

Fourat Mastouri — Senior Data Engineer

mastouri.fourat@gmail.com · fourat.dev · LinkedIn

Senior Data Engineer consultant focused on data platforms, distributed processing, data quality, and dependable engineering delivery. Professional experience spans healthcare, investment banking, retail banking, consumer research, consulting, and university teaching.

The downloadable résumé is generated from this accessible page. Experience status is stated as of the February 2025 résumé snapshot; please contact me for the latest engagement details.

Core expertise

- Data pipelines, ETL/ELT, distributed processing, data lakes, and platform architecture.
- Data quality, metadata, governance, pseudonymization, and operational reliability.
- Python engineering, automated testing, packaging, CI/CD, and DevOps practices.
- Technical leadership, mentoring, stakeholder communication, and production support.

Professional experience

Owkin — Senior Data Engineer, freelance

Paris, France · August 2023–February 2025 résumé snapshot

- Curated, harmonized, pseudonymized, and aligned medical datasets for AI and data-science use cases.
- Standardized data-quality and delivery practices for internal and external projects.
- Built metadata schemas and maintained automated testing and deployment pipelines.
- Mentored junior engineers and reviewed project delivery.

Technologies: Python, Poetry, Pydantic, Pandas, AWS, GitHub Actions, DevOps.

Natixis Corporate & Investment Banking — Senior Data Engineer, freelance

Charenton-le-Pont, France · February 2022–June 2023

- Designed and maintained pipelines for collecting, processing, and storing financial data.
- Improved ETL integrity and quality and contributed to data-lake architecture.
- Worked with business teams on reporting and analysis requirements.
- Mentored engineers and promoted maintainable delivery practices.

Technologies: Python, Spark, Hadoop, Jenkins, Bitbucket, Control-M, Indexima, XL Release, XL Deploy.

Société Générale — Senior Data Engineer, Davidson Consulting

Fontenay-sous-Bois, France · March 2019–February 2022

- Industrialized internal-fraud detection workflows in a big-data environment.
- Developed PySpark processing and enrichment modules and Hadoop data-collection pipelines.
- Supported data scientists, production applications, incident recovery, and GDPR compliance.

Technologies: Apache Spark, Python, Bash, Oozie, HDFS, Hive, Talend, Control-M.

Danone Research — Data Engineer, Davidson Consulting

Palaiseau, France · September 2018–February 2019

- Designed data-integration workflows for the SMART DATA program.
- Built a self-service portal for non-technical teams to access multiple APIs.
- Conducted a data-protection impact assessment and coordinated teams in France, Utrecht, and Singapore.

Technologies: Cloudera, Apache Spark, Python, Pandas, Alteryx, Impala.

Davidson Consulting — Big Data Consultant

Boulogne-Billancourt, France · September 2018–February 2022

- Supported clients delivering data projects in distributed environments.
- Contributed technical content to proposals, recruitment, and knowledge-sharing workshops.

Paris-Saclay University — Adjunct Lecturer

Évry, France · September 2019–June 2023

- Taught OLAP and multidimensional databases in the M2 IMSD master's program.
- Mentored students and supported academic internships.

Jems DataFactory / LiSSi — R&D Data Engineer, apprenticeship

Neuilly-sur-Seine, France · December 2017–August 2018

- Implemented big-data use cases in the JEMS DataLab and LiSSi research laboratory.

Technologies: Hortonworks, Elastic Stack, NiFi, Spark, Talend.

Education

Master's degree — Data Science and Data Engineering

Paris-Saclay University · 2018

Work-study master's program in Innovation, Markets, and Data Science.

Engineering degree — Information Systems

National Engineering School of Carthage, Tunisia · 2017

Information systems, object-oriented development, and software architecture.

Skills

- **Data engineering:** Spark, Airflow, Elastic Stack, Hadoop, Kafka.
- **Programming:** Python, Pandas, Pydantic, FastAPI, Bash.
- **Tooling and DevOps:** Git, Docker, GitHub Actions, Jenkins, Ansible, Make.
- **Databases and storage:** PostgreSQL, MySQL, Hive, Indexima, Amazon S3.
- **Languages:** French (native/bilingual), English (professional; TOEIC 985/990).

Certification

- Astronomer Certification for Apache Airflow Fundamentals, June 2024.

Engagement preferences

Freelance assignments, with remote or hybrid arrangements agreed according to the project, location, and collaboration needs.
